portfolio: <https://unknown010112.github.io/portfolio/> | GitHub: github.com/unknown010112

PROFESSIONAL SUMMARY

Data Analyst with a Computer Science background. Focus on end-to-end data pipelines, SQL, Python, Power BI, and Tableau. Built analytics solutions on large datasets to generate business insights and dashboards supporting decision-making and performance optimization

SKILLS

Data Analysis: Python (Pandas, NumPy), Advanced SQL (CTEs, Window Functions), Advanced Excel (Power Query, Power Pivot, DAX)

Business Intelligence & Visualization: Power BI, Tableau, Matplotlib, seaborn, UI/UX Dashboard Design

Data Modeling & Concepts: Relational Databases, Star Schema Modeling, Statistical Analysis, Hypothesis Testing

Tools & Workflows: Jupyter Notebook, VS Code, Git/GitHub, MS Office 365, Prompt Engineering (AI Integration)

Soft skills: Analytical Thinking | Data Storytelling | Problem Solving | Collaboration | Effective Communication

PROFESSIONAL PROJECTS

End-to-End Global Data Job Market Analytics | SQL, Python, Excel, Power BI

- Resolved complex data anomalies at scale across **500,000+** global job postings by engineering a robust ETL utilizing Python (`ast.literal_eval`, `explode()`) and advanced SQL (CTEs, Window Functions).
- Uncovered high-yield career pathways, identifying that specialized skills (e.g., PySpark) command up to **\$208,000** average salaries, by conducting advanced exploratory data analysis (EDA) with Pandas and Advanced Excel (Power Query, DAX).
- Accelerated data retrieval and user decision-making by reducing report load time by **30%**
- Empowered strategic job searching by translating raw data into actionable KPIs, accurately quantifying market trends (e.g., **16.2%** remote availability, **90%** full-time demand) and highlighting top skills that drive salaries up to **\$650,000**.

Enterprise Sales & Customer Insights Dashboard | Tableau, Advanced Data Wrangling

- Architected an interactive Tableau BI suite to monitor and optimize corporate performance, tracking and visualizing **\$733K** in total sales and **20.4%** YoY revenue growth.
- Improved executive decision-making by profiling **693 customers** and ranking profitability drivers, uncovering a **28.3%** surge in total orders and a **10.8%** increase in sales per customer.

US Public Health Analytics: Suicide Rate Trends | Python, Power BI, Power Query

- Built a data transformation pipeline using Python (Pandas, Regex) and Power Query to clean and restructure **5,400+** public health records, normalizing demographic categories (Age, Gender, Race).
- Developed a Power BI dashboard to visualize mental health indicators, benchmarking national suicide rate at **13.7 per 100k**.
- Identified high-risk demographics through multidimensional analysis, showing **65+** age group (**20.4 rate**)

EDUCATION

Bachelor of Computer Science

Faculty of Computers and Information, Sohag University | Expected Graduation: 2026

GPA: Very Good

Relevant Coursework: Data Mining, Database Systems, Statistics & Probability, Data Analytics

CERTIFICATIONS

- Power BI DAX & Modeling – LinkedIn Learning
- Data Analytics Specialist – LinkedIn Learning
- SQL for Data Analysis – LinkedIn Learning
- McKinsey Business Strategy Program
- Data analytics essential course –cisco

LANGUAGE

Arabic: Native

English: Advanced
